"Your Hardware Merchants"
AND WESTINGHOUSE DEALER

SUBSTANTIAL SURPLUS FOR HOSPITAL

The financial report of the Carmangay Stampede shows that a cash balance of something like \$375.00 will be handed over to the hospital board.

The stampede executive were well pleased with this year's performance, which showed a big increase in entries, attendance and cash.

The Manager, James Davey and members of the Association have worked hard to give the public a show that would build for its self a reputation that would be outstanding in stampede events, where the public could always depend on a good show and a square deal for all. This policy is now beginning to produce results as the records of the stampede show each year.

MAINTAIN SANITARY CONDITIONS IN THE POULTRY FLOCK

(Experimental Farms News)

Hygiene and sanitation are factors as important to the poultry flock as good stock, clean water, proper feed and range, states W. T. Scott, Head Poultryman, Dominion Experimental Station, Harrow, Ont.

Failure to maintain clean and sanitary surroundings is frequently the weak spot in poultry management. Cleanliness is essential, as high mortality and reduced egg production follow disease and impaired vitality. To ensure healthy surroundings, remove droppings daily and scatter an absorbent such as sand plaster over the dropping houses. Renew litter before it becomes too dirty, and supply clean water in clean vessels; disease may spread rapidly through the medium of dirty water or containers.

At least once a year, with a broom and brush, scrape and sweep clean the floors and walls of the poultry house, removing dust and cobwebs, and if running water is available use the hose at high pressure. Paint roosts and supports with a good coat of disinfectant, full strength, and spray frequently with a solution of the same product according to the instructions of the manufacturer. The range also demands its share of precaution. Gravel and sand should provide the best sanitary conditions and is easily worked with a one-horse plough. All range and yards should be ploughed and cropped yearly and seeded with a quick-growing crop. Sudan grass is palatable and greatly relished. To ensure a good supply, it is well to cut Sudan when about six inches high before allowing the birds access to the yards or range. Ideal sanitary conditions are supplied with a two or three year range rotation; a hoed crop intervening in the three year rotation provides additional protection against parasites that flourish in contaminated soil.

LOCALS

N. M. St. Peter, of Milk River, was a visitor in town last week.

Mr. and Mrs. C. Rhodes have returned from a pleasant vacation in Vancouver.

Miss Elva Mallory of Vulcan is a visitor at the home of Mr. and Mrs. P. M. Patterson.

Mr. and Mrs. P. Gatenby and family were Calgary visitors on Monday.

Frank Clapp of Bowden, was a business visitor in town on Sunday.

Mr. and Mrs. Alex Gault and family of Bellevue were Sunday visitors in town.

Mrs. F. Clever entertained at tea Monday afternoon in honor of Mrs. Starr who is a visitor in the district.

Word recently received from Mrs. M. Woodhill indicates that she expects to return to Champion sometime in August.

M. Boner is in charge of Maxwell's Barber Shop, during the absence of R. Maxwell on vacation.

Miss Isabelle Linton of Burns Lake, B. C. is visiting at the home of Mr. and Mrs. P. M. Patterson.

Mrs. G. M. Campbell entertained at a table of bridge on Friday evening complimentary to her guest Mrs. Bob Starr of Browning.

Mrs. F. Clever was a dinner hostess on Tuesday evening complimentary to Mr. and Mrs. Harry Harris of Grand Junction, Colorado.

Mr. and Mrs. G. A. Orr, Miss Edna Orr, accompanied by Miss Rhoda Campbell will leave Saturday for Spokane where they will holiday for a short time.

Mr. and Mrs. (Spice) Clayton Crane and sister, Dorothy, from Denver, Colorado, are visiting their parents Mr. and Mrs. R. C. Crane at their ranch west of town.

J. Walker returned Sunday from a two week holiday spent in Hood River Oregon and vicinity. Mrs. Walker is spending a few days visiting in Cowley, prior to returning home.

H. C. Jopling has been appointed agent in charge of the Western Canada Flour Mills elevator here and will take over his new position on Monday August 1st. Mr. Jopling succeeds J. Gittel in this position.

LOCALS

Miss Dorothy Hummel is a visitor in Calgary.

G. M. Campbell has returned from his vacation.

Miss Margaret Gatenby is visiting relatives in Vauxhall.

Mr. and Mrs. Fred Saddle are visiting friends at midnapore.

Buckley Campbell, formerly of Champion, is visiting at the home of E. B. Siler.

Mr. and Mrs. R. Maxwell and family are spending a holiday at Medicine Hat.

The Champion Junior ball team will play the Barons team on the local diamond, Sunday July 31, at 2:30.

Mr. and Mrs. W. H. Collison and family of Esau, Alberta are visiting at the home of Mrs. Callie's parents Mr. and Mrs. P. J. Larkin.

Mrs. M. Cemelini was a dinner hostess Monday evening when her guests included Mr. and Mrs. Harry Harris of Grand Junction Colorado, Mr. and Mrs. A. W. Jopling and Miss Ruth Jopling.

Helmer Anderson of Okotoks, who spent a few days in town last week renewing old acquaintances, is spending this week at Waterton National Park.

Mrs. Bob Starr, Frankie and Tommy Starr, who have been holidaying here for the past week, left today for Barons, where they will visit for a short while prior to leaving for their home in Browning, Montana.

M. G. Clever celebrated his 70th birthday on Wednesday July 27. Mr. Clever still plays the golf course at approximately 100 and boasts quite frequently of a recent motor trip in which he drove 85 miles in 85 minutes.

Practically every elevator in Champion is in the hands of a repair crew this week. New drive ways are being constructed and new stairs installed and other minor repairs are under way.

Work on the new Alberta Pacific is advancing very rapidly and it is expected that the main building will be completed by August 10.

A crew is busy at the Pool elevator, where they are installing new scales capable of weighing fifteen tons, in readiness for this year's business.

The warm weather of the past two weeks has made labor conditions very difficult.

Mr. and Mrs. Harry Harris of Grand Junction, Colorado, who have spent the past three weeks visiting at the home of Mr. and Mrs. A. W. Jopling, left Wednesday for Milk River where they will visit for a short time prior to leaving for their home in Colorado. Miss Ruth Jopling accompanied them to Milk River and it is expected that the next two weeks holidaying there.

The Champion Ladies' Social Credit Group were entertained at Yetwood on Friday July 22. Mrs. Root welcomed the visitors in her usual pleasing manner. Mrs. Chamberlin responded on behalf of the Champion Group. Mrs. Adams said a few words on behalf of the Lomond Group. A sumptuous lunch was served by the Yetwood Ladies which was greatly enjoyed. After which the crowd had the pleasure of hearing our M. L. A. Rev. Peter Dawson.

PIONEER FARMER CALLED BY DEATH

A large gathering of friends and neighbors attended funeral services of William John Sanderson, 64, who passed away in the Carmangay hospital on Friday, July 22nd, held in the United church on Sunday afternoon, with Rev. Peter Dawson officiating. The pallbearers were Archie Huggles, George Rhodes, E. J. Marshall, Roy Woodworth, Martin Edmister and Harry Newcome.

The late Mr. Sanderson was an old timer in this district, having taken up a homestead here in 1905, where he has resided ever since. He was a native of Ireland, coming to Canada in 1908, and was married to Margaret Muirhead, at Fernie, B. C., on September 5, 1904.

He leaves to mourn, his wife, two sons, Tom and Jack, and two daughters Mrs. Burton Ruggles and Mrs. Joe Fraser, and eleven grandchildren. Interment was made in the Champion cemetery, with D. D. Farmer in charge of arrangements.

A fire at Harvey Jopling's this afternoon caused quite an excitement for a short time. The fire destroyed a small building used as a wash house and the children's playhouse adjoining. Fortunately, the loss was not greater as there was a high wind blowing at the time.

Toronto Conservatory of Music Examination results: Theory—Grade III (Harmony) Marion Schmecke, pass, 63. Piano—Grade II Caroline Baker, First Class Honors, 82. Theory—Grade I Evelyn Sletto, First Class Honors, 98; Morag McDougall, First Class Honors, 98.

Following is the moisture for the district as recorded by the Seattle Grain Co.

From April 1st to each year.
Long time ave. Aug. 1st 9.09
Last year to Aug. 1 7.36
This year to July 28 4.54

The Chronicle would appreciate items of district news. Send or bring yours in.

Mrs. Linden has returned to her duties of catering for the Alberta Pacific crew. After a few days illness in the Carmangay hospital.

New Minister For Carmangay United Church

The induction service for the Rev. R. Taylor, newly appointed pastor of the United Church Carmangay, was held last Thursday evening by the Rev. Peter Dawson, and the Rev. William Morrison of Blackie.

Mr. Dawson, in his address to the congregation, impressed them of the importance of attending divine service regularly, which was essential to produce the desired inspiration to their pastor, and to give their children the training desired in the observance of the Sabbath.

Rev. William Morrison, in giving the charge to the new pastor advised him to stay steadfastly with the main duties of a minister, to teach and lead the congregation in religious observance, to encourage them when their faith was faltering and to give comfort to them in their sorrow.

Members and friends joined in a social period to welcome Rev. and Mrs. Taylor to their new home, and to hear a brief program contributed by Miss Mary Folk, Joy and Arnold Hermans. Lunch was served by the Ladies' Aid.

CHAPTER I

Jack Hammond reflected, as he walked up from the wharf, that rain was Prince Rupert's most beautiful drip.

He made the climb from the water front and cut across the little terrace park, where telen poles stood gleaming with moisture and grotesquely lonely. Everything dripped in Prince Rupert this morning, even the discolored stuffed Kodak bear in front of Al Monson's trading store. At last Hammond halted abruptly, looking over the wooden fence of a back yard. Howls and whines had centred his attention.

What are you trying to do with that dog?" he asked. A man halted in his effort to kick a harness mongrel into progress along a muddy space before a makeshift stall, weighted with stones.

"Going to make a sled dog out of him."

"That boss? He hasn't got the weight for it."

"Oh, he's pretty strong." The man grinned. "Say, they'll be buying any where this dog's going?"

"Where's that?"

The pseudo-trainer jerked his head toward the white pinnacles of distant mountains.

"Over the hills there in B.C.," the man said, "up the Caribou river somewhere around the valley of the Stikine. Haven't you heard about it?"

Hammond's features had become strangely grim.

"What's going on?"

"Where've you been that you haven't read the papers?"

"On the Alutian, coming up from Vancouver."

The dog trainer snarled.

"The ship that got in this morning?" he asked. "And you didn't know about it? Then you must have been deaf, dumb and blind. There were plenty of others who came on that boat—just because of it."

"Because of what?" Jack Hammond's hands, where they gripped the fence, were strangely discolored.

"Well, if you ain't kidding—the gold rush. Two fellows found placer gold up there. A couple of guys named McKenzie Joe Britten and his partner, Jack Hammond."

"Oh, I see," said Hammond jerkily.

"Well, I figured you might play the fool if you ever got to Seattle and that that girl, but I never thought you'd split the beans like you did. Why didn't you wait until you hit the bush again before you got drunk?" That he thought he took up in the Stikine country before break-up. In his hitting out of here with short supplies, to get in there and protect our interests before the rush starts. See our lawyer and be sure our claims and leases are in good shape. Then come in with supplies as quick as you can."

Hammond turned to the waiting boy beside him and ordered his bags taken to his room. Then he headed for the door again on the street, he started toward a three-story building a few blocks away.

This course was a broken one. Townspeople he knew asked him to question the accuracy of newspaper stories which Jack Hammond had not seen. His easiness only nettled them.

"What if you haven't seen the newspapers?" they asked. "You made the discovery. The Vancouver papers have been full of it. You know all about it—what's the use of trying to keep it a secret?"

Soon a crowd had gathered about him. Hammond fenced frantically. A big man, with a faint break of accent in his voice, poked a hand-skinned, bearded-out face close to that of Hammond.

"My name's Olson," he announced. "I've got a map here—arppose you point out the place to us."

Hammond pulled at his breath. "Maybe I'd better," he agreed. Then, as Olson pulled the map before him, "Didn't I see you on the boat from Vancouver?"

"Yah, you saw me," said Olson. "And a lot of others."

"Why didn't you come to me then?" "How anybody's figuring on going up here—maybe you wouldn't have been so anxious about getting off here."

"You got off, didn't you?" asked the man with the pack on his back.

"That was enough for me," came another voice. Then a short, red-faced, and with an excellent command of English.

"How about me? I saw the story in a Winnipeg paper and took a plane for Jasper Park. Then caught the train up here."

"Yeh, and I came from Prince George," cut in another member of the crowd. "I thought you'd go in from Alaska—around Wrangell."

"Well, I figured you might play the fool if you ever got to Seattle and that that girl, but I never thought you'd split the beans like you did. Why didn't you wait until you hit the bush again before you got drunk?"

For Your Preserving

Use It This Year

Wrangle by boat and up the Stikine river.

"You can't go up the Stikine this time of year," an outsider argued. "Might as well try to walk on ice."

"Will you let me explain the set-up?" Hammond insisted. "If you go in by way of the Stikine, you've got to make nearly 200 miles and double back. You can't turn off—

that river runs through canyons almost to Telegraph creek—way past the discovery. It's next to impossible to make the Stikine route on the ice."

"Boats make that river in the summer time," someone insisted. "Certainly," paddles wheeled. But they weren't. The spring break-up in that country lasts for months. That that creek—

Then Jack Hammond stood silent, listening to the jangle of words about him. Men were arguing about whether or not the discovery was correct, as if any newspaper were personal affront. All in an instant, the thought of gold had torn reason to shreds. Then Olson caught him by the arm and asked the question:

(To Be Continued)

Gossip Law In Papua

Idea To Arrest Offenders Did Not Get Very Far

Approves of Quebec's padlock law it is interesting to learn that similar ideas have gained acceptance among the natives of Papua in the South Pacific ocean, says the Toronto Star. The natives have their own councilors who act under the tutelage of British resident magistrates.

A law was adopted which made it an offense for anyone to spread slanderous reports about their fellows. The councilors thought that perhaps they could improve upon that law, which only covered after harm had been done. Their bright idea was to pass a law providing that "if two or more persons are found gossiping together, they shall be immediately arrested and put in jail for two months."

In this way "bad talk" would be prevented before it had time to do any harm.

Whether it was the radio or some virulent bacilli carried across the ocean by the wind that infected the natives with such a law, it is a matter of speculation. The incident shows how careful civilized beings must be in these days of the radio.

The top of this hill, the surface waters around the Hawaiian Islands, is warmer than around the edges of the hill, warmer even than that near the equator.

Warm water accounts for the heat. It is not as dense as cold water. It weighs less. Yet denser in the end under the warm water, the pressure at any level, due to the weight of water, is uniform.

The surface water tends to run down the sides of the hill. But it does not run straight down because it is also affected by the earth's rotation and by winds and consequently runs around the hill.

On the Hawaiian coast the surface rises seven inches in about 150 miles. This accounts in part for an inshore drift south of Point Conception. The evidence is all along the coast has come from 6,000 bottles dumped overhead last summer by the California Fish and Game Commission to test currents. About five per cent. of them came ashore at points along the southern coast of the state.

Newest Police Service

Cleveland Has Curb Station To Book Traffic Offenders

Violators of Cleveland's traffic regulations now receive a "curb service" at busy intersections. The city has opened what the officials said was the first police station in the city. A four-man police bureau on wheels not only arrested drivers, but charged them with violations on the spot of their offenses.

Looked out released them on bond for appearance in police court. John R. Hammond, deputy traffic commissioner, said the new method, said that "getting the cases while they're hot" speeds up police work.

Cricket fighting is a popular sport in China. The crickets battle in a bamboo arena.

Transport Act Enabling Railways To Make Agreed Charges

Provisions of the Transport Act enabling railways to make agreed charges with customers will come into effect probably early in September. The act was passed at last session of parliament but certain portions only came into effect when the railways companies were particularly anxious, when the bill was before parliament, that the agreed charges should be put into effect.

Under provisions of the Transport Act the railways will be able to make contracts with individual shipper to transport their goods at lower than the regular published tariffs on condition a shipper gives the railway company all its business. These agreements have to be ratified by the transport board.

Using Stamp Of Stalin

The Georgian features of Joseph V. Stalin will dominate the Soviet building at the 1939 World's Fair in New York, instead of red emblems.

Two prominent sculptors, Bogolubov and Ingals, have been ordered to design a statue of the Communist dictator, seated to the side of the building, for which architects are drawing designs.

Imperial Policy

Development Of The Dominions To Status Of First-Class Powers

One of the main objectives of imperial policy ought to be "encouragement of the gradual development of the Dominions until they attain the status of first-class powers, having decisive influence in the affairs of mankind," Colonial Secretary Malcolm MacDonald declared at Manchester.

Speaking at a luncheon of the Master's Chamber of Commerce, Mr. MacDonald said that if "industrial development of the Dominions is wisely guided, Great Britain is not going to be the loser."

"What wants developing in the Dominions is simpler forms of manufacture," As people went into the Commonwealth countries and engaged in production, they would make the Dominions a far larger market for Great Britain in the manufacture of more complex products.

He would like to see British and Dominion industrialists get together to work out a plan for complementary industrial production whereby, in the long run, he believed not only the Dominions but also the Mother Country would profit.

A "great constitutional experiment" is being held in period on in India in accord with the highest traditions of British Imperial statesmanship.

He disagreed with the view that the "experiment" had been a fatal step, beginning the complete separation of India and Great Britain. He often seemed to him that the greatest present danger of mankind was the creation of racial rivalry between East and West.

"It would be the final calamity for civilization, if one day war were to break out between East and West. What is wanted is sympathy and understanding between those peoples and the building of bridges which will prevent that division from taking place. The most important bridge of all is provided by Anglo-Indian friendship in the practical work of the Government."

Hills Of Water

Exist In Pacific Ocean Mostly Around Hawaiian Islands

Hills of water exist in the Pacific Ocean, according to Howard W. Henshaw, the University of California.

The greatest hill centres around the Hawaiian Islands. The water there is a little more than three feet higher than at the Aleutian Islands, 2,000 miles south.

This "hill" is mostly around the equator. It turns slowly around like a compass rose.

The northwestern edge of this gyral, which flows past the Hawaiian Islands, comes from the Aleutian coast, and then curves to flow southward along the west coast of the United States.

The top of this hill, the surface waters around the Hawaiian Islands, is warmer than around the edges of the hill, warmer even than that near the equator.

Warm water accounts for the heat. It is not as dense as cold water. It weighs less. Yet denser in the end under the warm water, the pressure at any level, due to the weight of water, is uniform.

The surface water tends to run down the sides of the hill. But it does not run straight down because it is also affected by the earth's rotation and by winds and consequently runs around the hill.

On the Hawaiian coast the surface rises seven inches in about 150 miles. This accounts in part for an inshore drift south of Point Conception. Automatic Elevator In New York

Block Went On Rampage

If you get the creeps in one of those automatic elevators where you push the buttons you want, it may not be entirely unpleasant.

Mildred Watson, 18, a Negro girl, stepped into one in the six-story apartment house in New York, where she works and pushed the button to go down.

The elevator sank to the first floor, stopped with a bump, and abruptly started up again.

Mildred stepped out in good luck, but slightly bewildered.

Then it went up again.

Then it went down again.

Then it went up again.

Then it went down again.

Then it went up again.

Then it went down again.

Then it went up again.

Then it went down again.

Canyon Under The Pacific

Is Believed To Contain All Varieties Of Minerals Known

The discovery of phosphorus 1,000 feet under water on a Pacific ocean canyon opens a new world for fortune hunters. The finding was described at the Scripps Institute of Oceanography by Dr. F. F. Shepard, geologist of the University of Illinois.

The fertilizer rock was dredged from the upper walls of the submarine canyon 50 miles off the coast of California. The phosphate nature of the rock, he said, was determined by K. O. Emery, who is making a study of the rocks collected from the canyon.

This canyon is one of scores discovered in ocean bottoms by geologists in the last two years. The canyons are in all oceans. They are an exception, however, in that the bottoms are not muddy. Their walls are rocky and the rocks are of all kinds, like those on land.

There is reason to believe that the submerged walls contain all the varieties of minerals known. Some of the canyons are as large as the Grand Canyon of the Colorado River.

The phosphate rock canyon is V-shaped, 100 miles long, and 10 miles under water. Its sides are from 1,200 to 2,000 feet high. Dr. Shepard's dredge took the samples from a stretch 20 miles long, indicating that the deposit is probably extensive and rich.

The phosphate was identified as of the Miocene Age. That age ended about 17,000,000 years ago. It is possible, Dr. Shepard said, that phosphates may be forming new in the submarine canyon. From this same area where it was found he brought up fossil bones of an unidentified animal.

The geological prospectors seek to learn the origin of these great chasms in ocean bottoms. They also want the most mystifying discoveries ever made. Their walls range from granite to soft shale. Some of the rocks are volcanic, but most of them are sedimentary, which means that they were formed by the weight of huge deposits of earth.

To Guard Switzerland

Little Nation Has Devoted Unusual Means For Its Defense

Hundreds of little, round metal manhole covers dot the highways and beyond of Switzerland near the Confederation's frontiers with Germany. They're a key part of Switzerland's national defense system.

Beide, a Swiss inventor, his piles of steel rails. Most travelers who see them think they've been left by the outside to do with as they please. Investigation, however, may show one end of the rails has been ground into a sharp point. When hasty Swiss soldiers leave their manoeuvres on the frontier, however, the secret is out. In the "battle" plans the "war" begins when the hypothetical enemy crosses the frontier.

Sharp stents scream out in the frontier. Swiss soldiers leave their troops tumble out of barracks and rush to their defence positions while the villagers and Swiss farmers turn to the highways.

Some villagers, using the simple lid lifts all Swiss lichen have by stoves since the little metal covers. Otherwise the rails out to the highways.

The little round holes reveal a deep slit with a reinforced concrete base. In go the rails with the sharp points pointed toward the frontier at a 45-degree angle.

They are always brought into use should come from the frontier. "These little round holes in the road," said an officer of the Swiss frontier guard, "mean the minutes, perhaps hours, of delay that may come day Switzerland."

Making Use Of Drugs

Japanese Trying To Understand Health Of Chinese North

War has always brought misery in its train; but there can be nothing in history so foul as the manner in which the Japanese are now trying to understand by the use of drugs, the health and morals of the inhabitants of the occupied area in the north. China and the world will all ways remember the stern and effective steps taken by Generalissimo Chiang Kai-shek to give the King of England and will regard the Japanese with loathing for the policy they are now following of encouraging the use of drugs amongst the Chinese and foreigners who are temporarily within their sphere of influence.

No Longer Plentiful

Union leader at Seattle says white collar workers must organize. But he says the white collar workers are not. We've just glanced around a roomful of chaps gathered to be in that class and could count only two white collars in the lot. The rest were blue, green, tan, grey, polka-dotted and doubtful.

"What's next on the screen?" asks a movie gossip writer. Flies, we guess.

Snakes shed their eyelids when they shed their skins.

Religious Broadcasts

Sunday Afternoon Sermons May Be Started In October

Although the newly-created national advisory council on the broadcasting of religious services includes representatives of the five larger Canadian churches, smaller religious organizations will not be neglected in religious broadcasts. Major Gladstone Murray, general manager of the Canadian Broadcasting Corporation, indicated.

Smaller denominations, including the Salvation Army, Disciples of Christ, Christian Science and Latter Day Saints will be given opportunities to share in the broadcast.

The national council is composed of the following: Rev. Carl V. Farmer, Baptist; Rev. Henry Brown and Rev. J. E. Ward, Church of England; Rev. J. B. Thompson and Rev. Joseph Vassan, Presbyterian; Mons. Edward M. Freeman and Rev. Charles Laphier, Roman Catholic; Rev. J. R. Mutchmor and William R. Orr, United Church. All are from Toronto.

Mr. Ward is chairman and Mr. Mutchmor secretary of the council.

It is proposed to provide two national half-hour religious broadcasts Sunday afternoons and regular half-hour regional broadcasts of religious services Sunday mornings.

The morning broadcasts will not be started until January at the earliest but the afternoon broadcasts will begin in October.

The corporation has set aside one half-hour, 12:30 to 1 p.m. (M.S.T.), and one half-hour, 3:30 to 4 p.m. (M.S.T.) for the new broadcasts. The first half-hour has been allotted by the advisory council to the Roman Catholics and the second to the Protestant churches starting as follows: Oct. 2, Baptist; Oct. 9, Church of England; Oct. 16, Presbyterians; Oct. 23, United Church.

Good News For Neighbors

Amateur Film Forbidden To Fly Its Home-Made Plane

Herman Schapansky, Weatherford, Okla., the builder and egg farmer who pilots his home-made planes to one-point landings—on the nose: has been grounded.

He was ordered to stay out of the air because he has no pilot's license. Neighbor farmers, accustomed to scurrying to sternal egress when they heard the scutter of Schapansky's motors, breathed a sigh of relief.

Schapansky, who sold and crashed his first plane in a jangled jump, bled with a "model T" motor after only three flying lessons—said: "It's a good flyer. They don't know an amateur young man a break in aviation any more. How far do you think the Wright brothers and Lindbergh would have gone if they'd got caught in this red tape?"

It was said most of the time Schapansky flies directly down a highway, so when he crashes he will be in a convenient place where his wife can pick him up.

On his last flight, he was seen to land by the house he exchanged for chert at an airport. Schapansky said he went up 200 feet, stalled and crashed. Neighbors told him he was from the cockpit bleeding.

Unlabeled, Schapansky built his first plane. For the new one he and crutches because so regular his wife said she stood by a telephone, the family car and trailer waiting nearby, ready to get him and the plane when it plumed down in someone's pasture.

No person ever went up with Herman.

Believe In Miracles

Couple In Ontario Escape Death In Grade-Crossing Accident

At least two people in Ontario must believe that miracles still happen, as well as accidents.

Their car stalled on a grade crossing.

A train came along at 80 miles an hour and cut off the front quarter of the car as cleanly as if a giant knife had done it.

They were left seated in the other three-quarters, without a scratch, although suffering from shock.

There's a man and his wife who have something to write home about. Unfortunately, for most people who drive onto grade crossings, when trains are approaching, there's nothing to write home about except funeral arrangements. —Detroit Free Press

Sir Henry Morgan, the famous privateer who was knighted by the King of England and made lieutenant-governor of Jamaica because of his fearless expeditions against the Spanish.

Peter Topp, foreman of the fish hatchery in Yosemite National park, eastern California, trains wildcats for hobby.

In Java, thunderstorms occur on an average of 222 days a year.

DIXIE is always fresh because you cut it as you use it!

PLUG SMOKING TOBACCO

An Educational Need

"The strength of a nation depends to an incalculable extent upon its educational facilities."

A whole volume—many volumes—of wisdom and truth are couched within the foregoing sentence, an extract from a brief submitted to the Rowell Commission on Dominion-provincial relations by two professors of the University of Toronto on behalf of the student body of the nation.

The purpose of the brief was to present to the Commission claims of students for the establishment of State scholarships to permit entry to the universities of the country of many who could never afford the opportunity which these institutions yield for broadening the mind and for training for leadership but who, otherwise, are well qualified.

The request for the establishment of such scholarships is based, not so much on the need for training minds which might subsequently be expected to be capable of contributing to technological development, but rather to ensure training of experts in the field of the social sciences, a sphere of activity in which, it is pointed out, comparatively little research work has been undertaken in Canada and for which no provision has yet been made in the programmes of the National Research Council.

Information supplied the Commission shows that in this respect Canada lags far behind the other Dominions as well as the United States and the Commonwealth; that in this country there is no provision for State re-education scholarships and that the number of awards from private sources is relatively small.

West In The Cold

Moreover, data and statistics contained in the brief demonstrate conclusively that in the matter of scholarships available from private sources the western provinces are discriminated against to an extraordinary but quite understandable degree. For, to quote the brief, "of \$24 matriculation scholarships available annually in this Dominion having an aggregate value of \$108,140, the Province of Ontario receives 288 with an aggregate value of \$76,000, leaving less than half the amount to be distributed in 226 awards in the remaining eight provinces."

As a result some of the brightest minds are directed to the eastern institutions of learning and, again to quote the brief, "that is the west deprived of the very men who might be expected to contribute most to a solution of her pressing economic, social and political problems."

Because of this situation and because of the inability of the provinces, and particularly the western provinces, to finance scholarships to anything like an adequate degree, it is suggested that Federal aid be sought to enable the provinces to finance State scholarships and that provide at least the means to ensure the education of those who show greatest promise in the field where the west urgently needs assistance—the cultivation of minds capable and fully equipped to solve problems of great magnitude.

Not The Entrance Key

It might be urged in opposition to such a plan that already too many students are being turned out of western universities for whom apparently there is no place in the commercial and economic life of the country under present conditions, but this can at least be partially attributed to the fact that brilliance and ability do not furnish the open sesame to the university classroom.

In too many instances desks in university classrooms are occupied by students who are sufficiently apt to scrape through entrance and subsequent tests with a minimum of effort and whose parents furnish the wherewithal simply because it is the thing to do because of university prestige is regarded as a hall mark of class distinction, or because it is believed that social or business contacts made will be of some assistance in later years.

On the other hand many who are mentally equipped to a far greater degree and who could derive a great deal more benefit from a university education are unable to do so because of family poverty or because of their own inability to finance their way through college. Thus there is a real loss not only to the individual and the family but to the community and perhaps the nation. Scholarships, such as those proposed to the Rowell Commission would, to some extent at least, remedy this condition.

Of Further Importance

There is a further thought worthy of consideration when the establishment of state scholarships is under advisement. When it is remembered that the universities are expected to turn out men and women who will, and should be, leaders of opinion in their respective communities and provinces, the necessity of affording every opportunity to youth of brilliant mind, capable of clear and logical thinking, to pursue their studies to a conclusion, is highly important in a country where the only new shaping of the future destiny, and in a day and generation when democratic institutions and form of government are threatened by new and untried political and social doctrines.

With a large number of people too inert to do their own thinking and willing to be stampeded in any direction at the behest of glib oratory, it is highly important that encouragement and opportunity be given to talent wherever it may be found and to give the best brains full opportunity for development in order that leadership in the future may be founded upon experience, logic and regard common sense, if the country is to make progress and the future of it to be assured.

Cost Of A Dukedom

It cost \$350 (\$3,750) to give the Duke of Windsor his dukedom. Supplementary civil list allowances, an item for stamp duties on "royal warrant, letters patent and the docket creating the Dukedom of Windsor."

People are reading fewer but better books than they used to, says a librarian. If they read only the better books they are certainly reading fewer.

Silkworms outgrow their skins four times during their rapid growing period.

GUM-DIPPING is a patented Firestone process not used in any other tire.

With it every hundred pounds of cord fabric absorbs eight pounds of rubber and, as a result, every fibre, every cord and every ply in a Firestone tire is coated and insulated with pure rubber to counteract internal heat and friction—the greatest enemy of a tire.

Due to this extra process, Firestone Gum-Dipped Cars have 58% longer flexing life. Yet you do not pay one cent more for this extra value. And you also get 2 Extra Cord Plies under the tread and the Firestone Scientifically Designed Safety Tread.

See the nearest Firestone Dealer today!

SELECTED RECIPES

SALMON JELL-O

1 package Lemon Jell-O
1 pint hot water
3 tablespoons vinegar
1 teaspoon salt
4 teaspoons drained home-made
1 cup dried peas, fresh or canned
1 cup cooked dried corn
Dissolve Jell-O in hot water. Add vinegar and 1 teaspoon salt. Pour small amount of Jell-O in bottom of pan. Chill until firm. Chill remaining Jell-O until slightly thickened. Add 1 teaspoon salt and home-made to salmon and vegetables and mix very lightly. When remaining Jell-O is slightly thickened, fold in fish and vegetable mixture. Turn to hot pan over firm Jell-O layer. Chill until firm. Garnish with crisp lettuce, cucumber and sprigs of parsley. Serve as is.

BEEF LUNCHEON SALAD

1 package Lemon Jell-O
1 pint hot water
3 tablespoons vinegar
1 teaspoon salt
1/2 cup dried cooked beef
1/2 cup shredded cabbage
1/2 cup diced green pepper
1/2 teaspoon minced onion
Dissolve Jell-O in hot water. Add vinegar and 1 teaspoon salt. Pour small amount of Jell-O in bottom of pan. Chill until firm. Chill remaining Jell-O until slightly thickened. Season beef, cabbage, and green pepper with 1/2 teaspoon salt and onion. Fold into slightly thickened Jell-O. Turn into individual molds. Chill until firm. Unmold on crisp lettuce. Garnish with mayonnaise and sliced hard-boiled egg or stuffed egg. Serve as is.

Do All Farm Work

Sister Years Manned For Forty Years Without Help

Miss Mary Williams has died at the Misses Williams' farm near Woodford, England, but her three sisters will continue to run the place without a man to help as the four had done for 40 years. The sisters plow, make hay and run a market garden, and with their ancient spinning wheel spin yarn. They also make their own clothes and stockings.

With 75,000 miles of highways, China has only about 50,000 automobiles, according to an official report.

KERNELS OF WHEAT

Since so much depends on the wheat crops of Western Canada why not guarantee the farmer a price that would enable him to operate at a profit. This same farmer if given a lift out of the hole with a respectable price, will automatically as a unit be a big factor in turning business on the upward trend.

As agricultural is our main source of revenue on the prairie, we should first put this industry on a paying basis, before we can look for prosperity in any large measure.

It may take a few million dollars to put this industry "agricultural" on its feet, we may have to irrigate many thousands of acres in our program to do so, but we will have something when we get through, with prosperity in our midst.

MONTANA OIL PRICES CONTROL FIGURE PAID IN TURNER VALLEY

Why the price of Turner Valley crude oil must be kept at a level having a very definite relationship to the price of Montana oil was explained in a memorandum submitted to the Tariff Board of Canada recently by E. G. Cottle, Chief Auditor of the Alberta Board of Public Utilities Commissioners. The memorandum was as follows: "Although Montana crude oil cannot compete with Turner Valley Crude at Calgary deliveries, it can quite definitely compete at deliveries in Saskatchewan and Manitoba or at Conits. This statement is based on the assumption that the price of Turner Valley crude must be low enough to secure the Saskatchewan and Manitoba markets."

"The lower crude prices in Montana result in lower refinery prices of finished products. This means lower refined prices, not only in southern Alberta but, by reason of the basis of the Alberta price structure, over the entire province. Lower refined product prices in Alberta naturally require a lower crude price for Turner Valley, so that crude prices in Montana control the price in Turner Valley independently of the product competition offered by Montana crude in Saskatchewan and Manitoba."

CARMANGAY

O. L. Taylor was a visitor in Pincher Creek last Friday.

Wyman Parker left for Montreal this week with a carload of horses.

Mr. and Mrs. Ledger of Calgary are visitors at the home of Mr. and Mrs. Alex McMillan.

Mrs. Dennis Nault has been a guest at the home of her sister Mrs. H. Nault, and Mr. Nault.

F. G. Beaumont has been appointed Returning Officer for the coming hospital vote.

Miss Ireland, matron of the hospital, is vacationing at the home of her parents in Saskatchewan.

Mr. and Mrs. Harry Sorag and family of Red Deer, have been guests at the home of Mr. and Mrs. John Hubka.

The North Priscilla club will hold their regular meeting on Wednesday, August 3rd, at the Ray Teskey home.

Mr. and Mrs. Gus Brownell have enjoyed a two week's holiday, visiting the latter's parents in Edmonton.

Mr. and Mrs. Talmer and daughter of Lewiston, Idaho, are guests of Mr. and Mrs. Alf Wynn.

Miss Helen Dockery, daughter of Mr. and Mrs. Green Dockery, left last week for Eureka, where she will visit her uncle and aunt Mr. and Mrs. Dodge.

Mrs. Donald W. Bond of Gleichen and small son, Donald Jr., are visiting at the home of Mrs. Bond's parents, Mr. and Mrs. O. L. Taylor.

Mr. and Mrs. Jack Scott and daughter Clara, accompanied by Mrs. Scott, Sr., of Calgary are visiting at the home of Mr. and Mrs. Alf Wynn.

Miss Edith Crantz and a younger sister and brother, left for Trail this week to make their home with their father, Ernie Crantz. Mrs. Crantz and the rest of the family will join them in August.

CARMANGAY

Bobbie Teskey, son of Mr. and Mrs. Vilas Teskey, is holidaying at Sylvan Lake with his uncle and aunt, Mr. and Mrs. Hugh Teskey of Taber.

Mr. and Mrs. Phil Burns, and little daughter, have been visiting at the home of the former's brother, Roy, and other relatives in the district.

Service will be held by Canon Winter in Emmanuel Church at 3 p.m. on the 31st July. This will be the last assembly until the third Sunday in September.

Mr. and Mrs. O. L. Taylor and Mrs. Donald Bond had as their guests Sunday, Miss Marion Mack of Chesholm and Ross Henderson of High River.

Mr. and Mrs. O. L. Taylor attended the wedding of Miss Marion Mack, only daughter of Mr. and Mrs. E. H. Mack, in Chesholm on Wednesday evening at 7 o'clock.

Mrs. Wm. McFarlane and son, Douglas, have left for Okotoks, where they will spend a few weeks, as Mr. McFarlane is time-keeper for the road gang stationed there.

Clarence White left last Saturday for a holiday to Vancouver, where he will join his wife and two sons, also his mother, Mrs. Wm. White, who are visiting Mr. and Mrs. Charles Collier.

Mr. and Mrs. Frank Hauser, their son and little daughter, and Miss Martha, Jensen, returned last week from a holiday at the coast. Mrs. Reiter accompanied them home and will visit with her son, Johnnie Hauser for some time.

Mrs. Hugh S. Gibson and her daughter Betty, are guests at the home of Mrs. William Peacock and Miss Joy Peacock. Mrs. Gibson will leave soon to visit with her sister, Mrs. John Bradford and her cousins, Mrs. A. and Willard Haig of Lethbridge.

Don't miss the Picture Show Friday night at 8:30. "On the Avenue" with Dick Powell and Madeline Carroll.

Little Bow Municipal - Hospital Scheme - Notice To Ratepayers

The Minister of Health has finally approved of the Municipal Hospital Scheme as submitted by the Hospital Board, and has ordered that a vote of the ratepayers be taken on the—

5TH. DAY OF AUGUST, 1938 FROM 9 A. M. TO 6 P. M.

The persons entitled to vote on the scheme shall be all persons who are liable for Municipal or Improvement District taxes and the husband or wife, or father or mother, or son or daughter of the aforementioned persons, who live within the hospital district, and are liable to pay Municipal or Improvement District taxes therein, and who are of the full age of twenty-one years and live with the said wife, husband, father, mother, son or daughter.
